

It could not be late!

"My wife has wanted (ed) to get rid of our 1987 carpet and replace it with tongue and groove flooring to match our kitchen, foyer and dinette area. I had been searching around for flooring for a while and everywhere I looked the cost was too high. Then I found Southern Yellow Pine to research their cost for flooring and shipping cost.

Their web site showed the cost flooring to be in my range but was still concerned about shipping cost of 1000 sq. ft. of their 6" pine flooring from the southern states to Wisconsin.

Jason was very easy to talk to and answered all my questions. The floor pricing was perfect and the so was the shipping, only about \$350. With this great new I decided to move forward with my order. When I ordered I told Jason this was a special gift for my wife on our 30th wedding anniversary. Would it be possible to get it delivered on the day of our anniversary?

Jason was very helpful in getting everyone involved on the same page for this surprise to happen on our anniversary date. Everyone was notified (the mill, trucking and sales) that if they called and my wife answered to not let her know what was going on. I was kept informed on every step along the way, so I knew the status of my delivery.

Everyone was wonderful to deal with and very helpful. It was the day of our anniversary and the delivery showed up on time and my wife was very surprised. We unloaded the 240 pieces of the 6" x 10' pine flooring into the house and the let the fun begin. I laid the flooring myself over the next two of months moving from room to room. We did our master bed room and walk-in closet, hall way, living room and two bed rooms.

The flooring went down with no issues and the boards were perfect. Very little sanding required and once stained and varnished the floors turned out great. Very pleased and glad we worked with Jason and his team. Great place to by flooring from at a great price." P Nushart 2017
