

From 2017 Louisiana Series these are all part of our existing menu of pine finishes and each of them should be considered a custom floor considering the widths can go up to 7” with 12’ bundles averaging over 7’ tongue and groove all four sides. The Monocoat 2-c process is used on all but the two-tone new heart pine on top row, this initial undercoat (2C) creates those custom edges you see as it gives the illusion of separation or age.

For more information of our designs or designing your own call us right now 1-888-286-2057.
